

# AMAZINGLY FLUID, REAL-TIME VIDEO EDITING ADOBE® PREMIERE® PRO CS5 FUELED BY NVIDIA® QUADRO®

## UNLEASH YOUR CREATIVITY

Blockbuster films are not made overnight, but with Adobe Premiere® Pro CS5 and NVIDIA® Quadro® graphics solutions, editing time can be drastically reduced. At the heart of Premiere Pro CS5 is the Adobe Mercury Playback Engine — built using the NVIDIA CUDA parallel processing architecture — so Quadro GPUs can deliver fluid, real-time previewing and editing of native, high-resolution footage, including multiple layers of RED 4K video.

Whether you're working on independent films or corporate videos, you are no doubt under tight deadlines, and stringent budget constraints. However, Quadro professional graphics solutions easily transform a workstation into a high-end post production system, at a fraction of the cost.

## UNPRECEDENTED PERFORMANCE

- > Refine and apply multiple color corrections and effects, in HD and higher-resolution sequences, with smooth scrubbing and playback — all in real-time!
- > Work in real-time on complex timelines and large projects with thousands of clips — whether your source is SD, HD, 2K, 4K or beyond.
- > Experience rich, vivid image quality with the broadest dynamic range with 10-bit color fidelity.
- > Easily span across multiple ultra-high resolution displays, including SDI monitors and projectors.\*
- > Immerse yourself in a true stereoscopic 3D and see remarkable detail with NVIDIA® 3D Vision™ Pro solutions
- > Designed by NVIDIA, built by NVIDIA, and directly supported by NVIDIA with an extended three year warranty.

## UPGRADE TODAY

The following Quadro professional solutions are required to accelerate the new Mercury Playback Engine in Adobe Premiere Pro CS5

### DESKTOP SOLUTIONS:

- > Quadro 5000
- > Quadro 4000
- > Quadro 4000 for Mac
- > Quadro FX 5800
- > Quadro FX 4800
- > Quadro FX 4800 for Mac
- > Quadro FX 3800

### MOBILE SOLUTIONS:

- > Quadro 5000M

*"NVIDIA Quadro makes Premiere Pro do cartwheels and flips and barely breaks a sweat."*
